Notice Regarding Acceptance of Computer Science Degrees For The Examination For Registration on Wednesday, August 28, 1996

In order to further the development and competitiveness of high tech industries, the U.S. Patent and Trademark Office has been working diligently to encourage innovation in the computer-related technologies and software fields by providing innovators with the legal protection they need to successfully promote their inventions. Because we recognize the value of services that can be provided by registered practitioners with qualifications in the high tech industries, we will include in Category A, as prima facie proof of possession of the scientific and technical qualifications to take the registration examination, degrees from Computer Science programs accredited by the Computer Science Accreditation Commission of the Computing Sciences Accreditation Board. All other Computer Science degrees will continue to be included under Category B, where courses will be evaluated on a case-by-case basis, until such time as we are able to adequately review other accreditation standards and complete the Office's study of the effectiveness of these degrees in assisting in the patent process.

The Office has scheduled the examination to be held on Wednesday, August 28, 1996, to accommodate various concerns raised by individuals who have indicated an interest in applying for the August examination. Because of the burden of an increasing workload on the Office of Enrollment and Discipline and the constraints on the U.S. Patent and Trademark Office for funding and staffing, it is still anticipated that only one exam will be given in calendar years 1997 and 1998. The registration examination for each of those years is still tentatively scheduled to be held on the third Wednesday in August.

For further information on either of these matters, contact the Office of Enrollment and Discipline by writing to the following address: U.S. Patent and Trademark Office, Box OED, Washington, D.C. 20231.

Notice of Change in the Method of Assigning Registration Numbers to Trademark Registrations

As of October 10, 1995, in the *Trademark Official Gazette* sections titled TRADEMARK REGISTRATIONS ISSUED, TRADEMARK REGISTRATIONS ISSUED UNDER SECTION 1(D), and SUPPLEMENTAL REGISTER, registration numbers will be assigned in ascending serial number order. Currently registration numbers are assigned in ascending class order by ascending serial number inside each class, e.g., in Class 1, Ser. No. 100,000 might be assigned Reg. No. 1,900,001; and in Class 42, Ser. No. 000,001 might be assigned Reg. No. 1,903,456. Under the new system, registration numbers will be assigned in ascending serial number order regardless of class, e.g., Ser. No. 000,001 would be assigned Reg. No. 1,900,001; and Ser. No. 100,000 would be assigned Reg. No. 1,903,456.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
